

BeanBlock®

Regulates appetite and healthy blood sugar levels

BeanBlock®

Regulates appetite and healthy blood sugar levels

How does it work

Beanblock® is a patented Phytoactive used in the treatment of high blood glucose and obesity related compulsive overeating as it prevents the absorption of carbohydrates and increases satiety.

In our fast-paced lives, we all need a supplement that has multiple benefits so we can target multiple concerns with one supplement. Weight management can feel like such a complex mountain to tackle, but it doesn't have to be. There is a simple solution for stabilizing blood sugar, reducing appetite and cravings, and reducing waistline circumference without having to perform intense physical work outs or follow restrictive, unsustainable, and unrealistic diets.

As a natural supplement for weight management, **Beanblock®** has been validated by several scientific studies for its ability to reduce the levels of post-meal glucose and insulin levels, which, if constantly spiking and dropping, can lead to weight gain or even diabetes.

Adding to its benefits, **Beanblock®** assists with weight management by increasing satiety after eating as well as reducing your appetite. **Beanblock®** works even better when paired with **GreenSelect®** and **SlimCarb®** as they both have additional benefits alongside a calorie-controlled diet and moderate exercise for weight management, making all 3 the ideal combination for assisting your body to get back on track with its health and achieve a healthy weight.

- Reduces appetite by 65%
- Up to 6,3 cm reduction in waist circumference
- Clinical studies prove effectiveness in reducing body weight

BeanBlock®

Regulates appetite and healthy blood sugar levels

BeanBlock® Benefits

- Optimizes the concentration of inhibitory proteins Alpha-Amylase (Starch blocker)
- Increasing patient satiety for longer
- Exerts satiety control through Glucagon-like peptide release and hormones
- Reduces flatulence and hunger
- Blocks the absorption of carbohydrates
- Results from a study conducted, observed that ingestion of **Beanblock®** for a period of 12 weeks significantly reduced the concentration of free radicals in blood plasma, suggesting that **Beanblock®** can reduce oxidative stress.

Did you know?

- **BeanBlock®** contains phytohemagglutinin which reduces the release of ghrelin and consequently decreases appetite
- **BeanBlock®** has patented technology that optimizes the concentration of inhibitory proteins called alpha-amylase and minimizes the presence of oligosaccharides in the intestine, reducing the production of gas/flatulence.
- Improved results when associated with a hypocaloric diet and physical exercise.

Dosage/Directions	Take one (1) BeanBlock® vegicapsule (100mg) twice daily before main meals
Ingredients	Standardised Phaseolus vulgaris L. Extract 100mg; Microcrystalline cellulose; VegiCapsule
Type	60 Vegicaps
Indications	Regulates Appetite, Reduces Flatulence, Reduces BMI, Increases Satiety
