

GreenSelect®

Reduces triglycerides and total cholesterol levels

GreenSelect®

Reduces triglycerides and total cholesterol levels

How does it work

GreenSelect® Phytosome is a proprietary, caffeine free, catechin extract from green tea formulated with phytosome technology.

Excess weight, or even obesity can lead to a myriad of physiological problems including high blood pressure, type 2 diabetes, high cholesterol levels, and even atherosclerosis, all of which significantly reduce a person's quality of life at some point. But what seems like a mountain to tackle, can easily be approached by using a natural, caffeine free supplement geared towards reducing weight and BMI, assisting in the prevention and treatment of metabolic syndrome, with the additional benefits of preventing muscle breakdown and promoting muscle gain, as well as having neuroprotective properties. Patients using **GreenSelect®** in scientific studies, experienced up to 68% improvement in their body weight, lipid profile, and blood pressure, whilst up to 80% of those patients that did not take **GreenSelect®**, maintained their original condition.

Rich in green tea extracts, **GreenSelect®** is saturated with catechins and epigallocatechin gallate, and promotes thermogenesis, increased caloric expenditure and weight loss. **GreenSelect®** harbors phytosomal technology which protects and reduces breakdown of the active ingredients before they reach their site of absorption, and this ensures a better bioavailability and greater absorption of the active ingredients that exert these physiological benefits.

GreenSelect® works even better when paired with **BeanBlock®** and **SlimCarb®** as they both have additional benefits for weight management, making all 3 the ideal combination alongside a calorie-controlled diet and moderate exercise for assisting your body to get back on track with its health and achieve a healthy weight.

Lose up to 15 kg in 90 days*

- Reduces total cholesterol and triglycerides
- Promotes energy expenditure and thermogenesis
- Caffeine free

* Based on clinical evidence in individuals weighing 95 kg (DI PIERRO F., et AL. 2009)

GreenSelect®

Reduces triglycerides and total cholesterol levels

GreenSelect® Benefits

- Reduces triglycerides and total cholesterol levels
- Caffeine-free
- Increases energy expenditure and thermogenesis
- Reducing BMI, Metabolic syndrome, waist circumference and body weight
- Antioxidant activity
- Phytosome technology increases the bioavailability of the actives
- Its thermogenic action promotes greater elimination of body fat.

What makes GreenSelect® Phytosome® unique?

- Double standardization in EGCG and tea catechins
- More than 2-fold increase in oral bioavailability of EGCG compared to non-Phytosome® formulations²
- Proven antioxidant³
- Several studies demonstrated its effectiveness in reducing metabolic syndrome, body weight, waist circumference and BMI
- Improved results when associated with a hypocaloric diet and physical exercise.

Dosage/Directions	Take one (1) GreenSelect® vegicapsule (120mg) twice daily
Ingredients	Standardised Camellia sinensis L. Extract 120mg; Microcrystalline cellulose; VegiCapsule
Type	60 Vegicaps
Indications	Reduces BMI, Free of Caffeine, Highly Bioavailable EGCG, Antioxidant
